

ProPlay-HP23el

Technical data sheet

ProPlay-HP23el professionally designed as a sport technical performance layer for artificial turf sports fields.

Vertical and Horizontal drainage!

As well as the necessary sport technical performance characteristics, the ProPlay-HP23el has additional (in-plane) drainage channels which ensure adequate gradient drainage of water to complement the vertical drainage capability and in case the artificial turf system is to be built on a sealed or subsequently underperforming existing sub base.

For a prompt installation, the ProPlay-HP23el is supplied as rolls with a width of 1 or 2 m which are equipped with expansion slots. The installation guide can be downloaded at our website (www.schmitzfoam.com) or available upon request from our sales department.

Physical characteristics

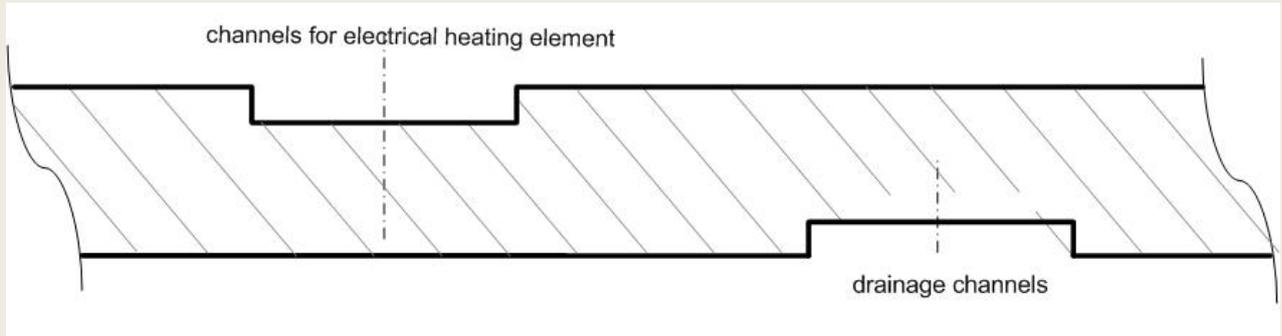

ProPlay-HP23el consists of thermal bonded (closed-celled) cross-linked Polyethylene foam (PEX). This foam originates from production residues and contains no contaminants. ProPlay-HP23el is fully tested based on microbiological resistance (according EN 12225) resistance to: weathering (according EN 12224), oxidation (according EN-ISO 13438), acids & bases (according EN 14030). The predicted durability of PEX is a 100 years minimum (according ISO/TR 13434).

ProPlay-HP23el is tested by simulated mechanical wear using the Lisport wear test. Even after 65.000 cycles (Lisport simulated average 30* year usage) there are hardly any differences in sport technical characteristics (SA,VD, HIC).

The ProPlay-HP23el is tested on simulated ageing weatherability according EN 13744 and EN 13817. This ageing test has virtually no influence on the dimensional properties of ProPlay-HP23el.

* based on 1 cycle = 1 hour of usage and 2080 hours of usage per year (average usage of 52 weeks a year and 40 hrs a week)

Technical data Fout! Ongeldige koppeling. *AAA = Advanced Artificial Athlete

The provided information is, to the best of our knowledge, true and accurate (at the time of revision). This information is based on (independent) measurements and (where possible) based on average values, measured over a long and representative period. Additional information (e.g. additional characteristics, specific (independent) reports or statistical analysis) is available upon request. Schmitz Foam Products is allowed to change this information and/or the product (without notice) and assumes no legal responsibility for use of and/or reliance on this information.
