

The Acres Dressage, LA

Project	New surface for horse arena, Moorpark
Construction	Recytop-Horse HSPG
Application	Dressage
In cooperation with	Hof Kasselmann

High quality base for top performance

Jan Ebeling, Olympian & champion dressage trainer:

'We have been using our new riding arena now for about one year and I can't tell you how satisfied we are with the watering system as well as the footing (HSPG High Score Performance Ground). As you had promised the moisture level is perfect and it is very easy to adjust. As you know the summers in California are hot and dry but the footing stays perfect every day. My 500 gallon water wagon I used to water the arena with 4 to 5 times a day has since been parked in the tool shed. We are also using a lot less water than before.

The sand textile mixture seems to retain the moisture very well and the footing gives you a great feeling when riding on it. The elastic mats certainly contribute to the firm but yet springy footing. We have noticed especially with some of our older horses a very positive effect in their movement as well as soundness. We have also had a lot of positive feedback from clients that trailer in from time to time to take lessons.

I can only say the very best about the system and thank you again for the speedy installation and great customer service you have provided.'
